Timetable information all the time and everywhere with the PostBus app

The new PostBus app is one of a kind: not only does it connect all public transportation in Switzerland, it also provides car, ride, and bike sharing options.

Directly on the start screen, the countdown display shows the departure times from your location to the personally defined destinations so that you always know precisely when you have to leave.

With the PostBus Auto app you can buy public transportation tickets for all transport companies in Switzerland - train, bus, tram, boat or postbus. Further information is available at postbus.ch/app

Real-time information

At the entrances to PSI East and West, the timetable display shows the next departures in real-time. This is particularly useful if the postbus does not arrive at the scheduled time. You see exactly how many minutes it will take until the next postbus leaves.
